

IN THE CLAIMS:

The text of all pending claims (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~strikethrough~~. The status of each claim is indicated with one of (ORIGINAL), (CURRENTLY AMENDED), (CANCELLED), (WITHDRAWN), (NEW), (PREVIOUSLY PRESENTED), or (NOT ENTERED).

Please AMEND claims 1, 3, 5 and 6 and CANCEL claim 4 as follows:

1. (CURRENTLY AMENDED) A communication setting management system for distributing communication characteristics setting to a plurality of communication entities, comprising:

a setting template entry/edit means for unit operated by a first administrator to ~~entering enter or editing edit~~ a setting template that collects contents to be set for the communication entities, with reference to information on a concrete method of setting the communication entities;

a setting template storing means for unit storing each setting template entered or edited by the setting template entry/edit means unit as operated by the first administrator;

an application rule entry/edit means for unit operated by a second administrator to ~~entering enter or editing edit~~ application rules prescribing rules of which corresponding to the setting template, entered or edited in the setting template entry/edit unit operated by the first administrator, which is to be applied to a communication having a specific attribute;

an application rule storing means for unit storing each application rule entered or edited by the application rule entry/edit means; and

retrieval and response function means for unit selecting an application rule from the application rule storing means in accordance with an attribute of a corresponding destination communication entity, reading from the setting template storing means a setting template having a setting template name specified by the selected application rule, and distributing the read setting template to the corresponding destination communication entity.

2. (ORIGINAL) The communication setting management system according to claim 1, further comprising:

setting template collective entering means for collectively entering a group of previously

defined setting templates into the setting template storing means.

3. (CURRENTLY AMENDED) The communication setting management system according to claim 1, further comprising:

a plurality of management domains each having at least one communication entity, the management domains communicating via a network; and

a communication setting management apparatus disposed in each of the plurality of management domains the communication setting management apparatus, disposed in a corresponding management domain, imparting, on a management domain basis, different communication characteristics settings to respective communications between communication entities belonging to different management domains, each communication characteristics setting being managed on a corresponding management domain basis.

4. (CANCELLED)

5. (CURRENTLY AMENDED) The communication setting management system according to claim 43, further comprising:

a contradiction detection function unit for mutually interchanging information between communication setting management apparatuses disposed in respective, different management domains, and detecting a contradiction between the information and the setting template and the application rule of its own management domain.

6. (CURRENTLY AMENDED) The communication setting management system according to claim 5, further comprising:

a contradiction modification function unit for modifying a contradiction, at the time when the contradiction is detected, that a setting template or setting templates specified by the contradiction detection function unit according to the application rule to be the same, instead, are not.
